

Dear Researcher,

Thank you for your inquiring about the Oregon Speech-Language Hearing Association's process for informing members of research participation opportunities.

If you would like your research opportunity posted on the Oregon Speech Language Hearing Association (OSHA) website, please provide an IRB approved description of your research for recruitment purposes that includes 50 character or less (including spaces), title for the posting, description of the study purpose, eligibility criteria to participate, any relevant details related to participant compensation, contact information for the PI of the study, and any processes for participants to report potential complaints about their treatment as a research participant (as specified by your institution). Additionally, please provide us with the date of expiration of the request (i.e., the time at which you plan to have completed recruitment and we can delete the post).

Please note, it will be your responsibility to ensure that your institution's IRB has approved posting your recruitment materials to our site in this manner. *OSHA assumes no responsibility for vetting the content of these postings.*

Sincerely,

The Oregon Speech-Language and Hearing Association
